

SOURABH RAMTEKE

Full-Stack Java Developer • Software Engineer

+91-7089046319 | sourabhramteke1311@gmail.com | github.com/maa101-hub | [LinkedIn](#) | Balaghat, MP

PROFESSIONAL SUMMARY

Full-Stack Java Developer and MCA candidate at NIT Trichy with proven experience building production-grade microservices, REST APIs, and AI-powered applications. Skilled in Spring Boot, Apache Kafka, WebSockets, and cloud deployment. Delivered end-to-end systems including a scalable airline booking platform and a real-time social networking platform. Strong collaborator with a track record of clean, maintainable code in Agile environments.

EDUCATION

Master of Computer Applications (MCA) — NIT Trichy, Tiruchirappalli, TN *July 2023 – May 2026*
CGPA: 7.6

B.Sc. (Computer Science) — Govt. Holkar Science College, Indore, MP *July 2020 – May 2022*
Percentage: 80.63%

WORK EXPERIENCE

Software Engineer Intern — Mphasis IT & Services, Hyderabad *Feb 2026 – May 2026*

- Built and shipped production features end-to-end within Agile sprint cycles, contributing across the full SDLC from design through QA to deployment.
- Developed and tested RESTful APIs in Java and Spring Boot, applying enterprise patterns — layered architecture, centralized exception handling, and input validation.
- Collaborated with cross-functional teams (dev, QA, PM) on sprint planning, code reviews, and iterative feature delivery, consistently meeting sprint commitments.
- Deepened expertise in backend architecture best practices within a large-scale corporate codebase, improving code maintainability and long-term readability.

PROJECTS

Skyway's – Airline Flight Booking System *Feb 2026 – May 2026*

Tech Stack: *Java · Spring Boot · Microservices · React.js · MySQL · Apache Kafka · JWT · Razor pay*

- Architected a scalable airline booking platform using Spring Boot Microservices with independent service separation for flights, bookings, and payments.
- Implemented JWT authentication with Role-Based Access Control (RBAC), enforcing strict Admin vs. Customer permission boundaries across all API endpoints.
- Built a complete booking workflow covering flight search, dynamic fare calculation, seat management, and Razorpay payment gateway integration.
- Integrated Apache Kafka for asynchronous event-driven email notifications, decoupling the notification pipeline for improved fault tolerance and resilience.
- Designed an optimized MySQL schema with centralized exception handling and structured application-level logging for reliable production operations.

Campus Connect – Social Networking Platform *Nov 2025 – Apr 2026*

Tech Stack: *Java · Spring Boot · React.js · Zustand · WebSocket · MySQL · JWT · Spring Boot Actuator · AOP*

- Built a microservices-based social networking platform supporting user profiles, posts, follows, and real-time messaging for campus communities.
- Implemented bi-directional WebSocket communication for live chat and real-time feed updates, measurably reducing communication latency for end users.
- Secured all APIs with JWT authentication, OTP verification, and centralized exception handling; added Spring Boot Actuator + AOP-based logging for observability.

- Delivered a responsive React.js UI with Zustand state management; collaborated in Agile sprints using Git/GitHub for version control and code reviews.

AI Resume & Interview Coach

Jan 2025 – Mar 2025

Tech Stack: *React.js · Fast API · Python · Gemini API (LLM) · REST APIs · Verel · Render*

- Engineered a full-stack AI career tool with a React.js frontend and FastAPI backend powered by Google Gemini LLM for intelligent resume analysis.
- Designed an ATS scoring engine that parses job descriptions, identifies keyword gaps in resumes, and generates targeted optimization suggestions.
- Launched an AI mock interview module that auto-generates role-specific HR and technical questions with real-time automated scoring and feedback.
- Deployed to production on Vercel (frontend) and Render (backend) using a scalable, cloud-native architecture with reliable concurrent-user handling.

CERTIFICATIONS & ACHIEVEMENTS

- **HackIndia 2025:** HackIndia 2025 — LIET UP West Regionals (Oct 2025)
- **Amazon HackOn S4:** Coding Round — HackOn with Amazon, Season 4 (Jun 2024)

TECHNICAL SKILLS

Languages: Java • JavaScript • Python • SQL • C • C++

Backend: Spring Boot • Spring Security • Fast API • Node.js • Apache Kafka • WebSockets • REST APIs

Frontend: React.js • Zustand • Tailwind CSS • Socket.IO

Databases: MySQL • PostgreSQL

Tools: Git • GitHub • Postman • VS Code • Eclipse

Concepts: Microservices • JWT • RBAC • AOP • CI/CD • Cloud Deployment

Soft Skills: Problem-Solving • Team Collaboration • Adaptability • Attention to Detail • Time Management
